PROFESSIONAL SUMMARY

Analytical and intellectually curious Data Scientist with 6 years of experience turning large, complex datasets into actionable business insights. Specialises in machine learning, NLP, and predictive modelling. Published researcher with hands-on production ML experience in retail, insurance, and SaaS domains.

WORK EXPERIENCE

Data Scientist (Lead) — Zurich Insurance Ireland

Apr 2021 – Present

- Built a fraud detection ML model (XGBoost + SHAP) that identified €3.2M in fraudulent claims in year 1.
- Developed a customer churn prediction pipeline integrated into Salesforce CRM, reducing churn by 18%.
- Led a cross-functional team of 3 analysts; established MLOps practices using MLflow and Docker.
- Presented insights to C-suite via executive dashboards built in Power BI.

Data Scientist — Tesco Ireland (Analytics Hub)

Jun 2018 – Mar 2021

- Designed a demand forecasting model (LSTM neural network) improving stock accuracy by 12% across 150 stores.
- Performed large-scale customer segmentation using K-Means and hierarchical clustering on 5M+ loyalty records.
- Automated weekly reporting pipelines using Python and Apache Airflow, saving 20 analyst-hours per week.

Junior Data Analyst — Accenture Applied Intelligence

Sep 2016 – May 2018

- Cleaned, transformed, and analysed structured and unstructured datasets using Python (pandas, NumPy).
- Built regression models and dashboards for a telecom client's customer lifetime value project.

EDUCATION

MSc Statistics & Data Science — Trinity College Dublin | 2016

BSc (Hons) Mathematics — Trinity College Dublin | 2014

TECHNICAL SKILLS

Languages	Python (expert), R, SQL, Scala
ML / AI	Scikit-learn, XGBoost, TensorFlow, PyTorch, HuggingFace, SHAP
Data Eng.	Apache Spark, Airflow, dbt, Snowflake, BigQuery
Viz & BI	Power BI, Matplotlib, Seaborn, Plotly, Tableau
MLOps	MLflow, Docker, GitHub Actions, AWS SageMaker

PUBLICATIONS & ACHIEVEMENTS

- Co-author: 'Temporal Attention in Retail Demand Forecasting' – ECML 2022
- Kaggle Competitions Expert | Top 3% globally
