PROFESSIONAL SUMMARY

Passionate Full-Stack Software Engineer with 7 years of experience building scalable web applications and microservices. Proficient in Python, TypeScript, and cloud-native architectures (AWS). Committed to clean code, test-driven development, and continuous delivery.

WORK EXPERIENCE

Senior Software Engineer — Fintech Dynamics

Mar 2021 – Present

- Architected and built a real-time payments processing API handling 2M+ transactions per day using Python/FastAPI and Kafka.
- Reduced API latency by 40% through query optimisation, Redis caching, and database indexing.
- Led migration of a monolithic Django app to microservices on AWS ECS/Fargate.
- Conducted code reviews, set engineering standards, and mentored 3 junior engineers.

Software Engineer — WebWorks Agency

Jul 2018 – Feb 2021

- Developed React/TypeScript front-ends and Node.js REST APIs for 10+ client projects.
- Implemented CI/CD pipelines using GitHub Actions, Docker, and AWS CodePipeline.
- Integrated third-party APIs including Stripe, Twilio, and Google Maps.

Junior Developer — StartupLab Cork

Sep 2016 – Jun 2018

- Built and maintained features for a SaaS platform using Django and Vue.js.
- Wrote unit and integration tests achieving 85%+ code coverage.

EDUCATION

BSc (Hons) Computer Science — University College Cork | 2016

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, SQL, Bash
Frameworks	FastAPI, Django, React, Node.js, Express
Cloud & DevOps	AWS (EC2, S3, RDS, Lambda, ECS), Docker, Kubernetes, Terraform
Databases	PostgreSQL, MySQL, Redis, MongoDB
Testing	pytest, Jest, Selenium, TDD/BDD

CERTIFICATIONS & PROJECTS

- AWS Certified Solutions Architect – Associate
- Open-source contributor: github.com/conormurphy/fastqueue (1.2k ■)
